Ramnath Dhadage - Recognition History - Award Programs

Quarterly Award - Innovator 2025 (Q2)

Given By
Mrityunjay Kumar (EB210411)

Program name
Quarterly Award - Innovator 2025 (Q2)

Given date
01-Aug-2025

Nomination Note
He led the migration to Teal v0.16.0, actively supported teammates during the transition, and integrated LUNA into CDEx, empowering BMS clients to interactively explore clinical data and generate visualizations based on natural language prompts. He also co-authored a PharmaSUG 2025 paper with BMS client and resolved critical performance bottlenecks—improving plot load times by 30–40%.To further enhance the Teal framework, He integrated JavaScript-based visualizations for more interactive data exploration and developed cross-domain correlation modules. He also built scalable workflows, resolved complex bugs, and mentored team members.He also developed the blockr packages for generating tables and plots—recognized at R in Pharma 2024—and the enablement of R code export for SDTM-based Teal modules. He made key enhancements to teal.BMS by including app state snapshotting, bookmarking, and reporting functionality. Additionally, He developed the Nightingale library and a companion plot gallery, which he presented at Coder's Corner.Above mentioned efforts have significantly improved system performance, enhanced user experience, and strengthened client engagement—directly supporting our team's mission of excellence and innovation.
